

# Standards Alert

Part of the Energy Queensland Group

Subject: <b>Energex and Ergon Energy Overhead Construction and Design Manual Updates</b>	Control Ref No: StdsA520
	Date Issued: 19/06/2020
	Supersedes: -
For Policy/Procedure/Manual: <b>Overhead Construction Manuals Overhead Design Manuals</b>	Expiry Date: 31/12/2020
Originating Dept: <b>Asset Standards: - Line Standards</b>	
Target Audience: <b>EQL</b>	

## 1. Introduction

This Standards Alert is issued to advise:

- Issue 33 update to the Energex Overhead Construction Manual
- Issue 13 update to the Energex Overhead Design Manual
- Issue 26 update to the Ergon Energy Overhead Construction Manual
- Issue 3 update to the Ergon Energy Standard for Distribution Line Design

## 2. Amendments

Refer to amendment sheets in each manual to familiarise yourself with the updated drawings & sections.

Please note that previous Issue updates (31 and 32) have been added to the Energex Overhead Construction Manual amendments sheet for clarity and reference.

## 3. Update to Manuals

Updated copies of Overhead Design and Construction Manuals are available via the Asset Standards intranet site or via the RED document system for internal staff.

The up-dated manuals are available to external service providers via the internet. The Manuals are uncontrolled documents when printed.

## 4. Deployment

Compliance with the requirements of the revised Manuals is expected from publication of the manual and this Standards Alert unless dispensation is granted in writing by Line Standards having regard to the circumstances.

## 5. Future Updates

In future, the online OH Construction and Design manuals will be updated on a more regular basis, and a specific Standards Alert to advise of the updates will not be issued every time. Individual drawing changes/updates will typically be advised via separate Standards Alerts as per current processes, and users can also reference the amendment page for each manual to view what has been updated.

Please regularly update any local versions, or only use the online copy of the manuals where possible to ensure you have the latest version.
